

## **16. Mr Chak –Transportation – Minibus Driver**

Since many factories started moving to the North at that time  
There were not many jobs available  
Also my father was a minibus driver  
So I started working in the industry  
I need to pay attention to the traffic situation on the road  
And I also need to get the minibus license issued by the Transport Department  
We need to take the passengers to their destination within the quickest time every day  
Sometimes we would change the route  
When there is traffic congestions or other emergencies  
The most important thing is to reach the destination as soon as possible  
So that the passengers can go to work on time  
Once a passenger left his wallet on my minibus  
I found his contact information and contacted him  
He then wrote a letter to compliment on me and sent to the station  
Transportation has developed rapidly nowadays  
And not many young people are willing to join the industry now  
The industry is declining  
Since time of work is scheduled by myself  
It won't affect other things  
We can also find our interests in the industry  
And earn money based on our own timetable  
The most important thing is not to disregard the safety of passengers  
And drive carefully
