<b>Jason – 機械工程</b>	<b>Jason - Mechanical Engineering</b>
首先介紹下我自己讀什麼科目	Let me introduce my major subject first
我是讀機械工程的	I am studying mechanical engineering
今年大學四年班	I am a year 4 student
為什麼會選擇這一科	Why did I choose this subject
主要是考試計分	It is mainly because the GPA is calculated based on examinations
上課時間也很多	Moreover, there is a lot of lesson time
一課一個星期三個小時	Each course has a 3-hour lesson per week
一個學期有五科	And we have five courses in each semester
所以大概 15 個小時一個星期	Therefore, we have around 15 hours of lesson time per week
這一課的最大得着我覺得是	I think my greatest reward in this major subject is that
我學了很多機械的知識	I have learnt a lot of knowledge about mechanic
同時亦有機會可以實踐這些知識	And I have chances to apply them
可以親身去試	I can try out things myself
同時間，通常平時其他科目	Meanwhile, other major subjects usually
主要是讀書考試寫論文	require students to study, take examinations and write essays
但我們的課比較多在實驗室做實驗	But we spend more time in the lab doing experiments
或者做其他不同的應用	Or various applications
我覺得讀這一課	I think the biggest challenge of
其中一個最大的挑戰是	studying this major subject is that
本身學校很少會一步一步地教你	The school doesn't teach you step by step
很多時候都要自己去嘗試	You need to try on your own most of the time
可能某些特定的問題才會問導師或者教授	You only seek help from the tutors or professors with some specific problems
所以我覺得這一個最大的得着是學到如何自我學習	So I think the greatest reward is that I have picked up self-directed learning
如果大家想選這一課最重要是數學的底子要好	If you want to choose this as major subject, you need to have a good foundation in Mathematics
同時間對機械、車、飛機方面	At the same time, you are better to be interested in
有多些興趣才好選擇這一課	Mechanical, vehicles and planes
