Kelvin - 物理治療	Kelvin - Physiotherapy
我選擇物理治療這一科的主原因是	The main reason why I chose to study Physiotherapy is that
我想幫助社會上不同的人	I want to help different people in the society
包括身邊的朋友或老人家	Including my friends and elderly
因為我這方面的知識能夠幫助邊的朋友或老人家	Since the knowledge of this subject could be really helpful
在日常中受傷都能幫他們治療	I can help when they get hurt in their daily life
以及工作時都能幫助不同的人	I can also help others at my work
主要先理解人體的結構	First, I need to know about the structure of a human body
然後去認識不同的病症	And different illnesses
再用所學的專業知識及技巧去診斷和治療	Then I use the professional knowledge and skills to diagnose and treat the patients
都挺忙	It's quite busy
有三至四日是由九點上課至五點	There are 3 to 4 days in a week that I need to have lessons from 9 am to 5 pm
然後有一兩日是半天	And I need to have half day lessons for 1 to 2 days
考試就一年只有兩次	There are only 2 exams in a year
當中只有三個項目的考試	There are only 3 items that need to be examined
功課就近乎沒有	There is almost no homework in the course
只有一兩編論文	There are only 1 to 2 essays for the students to write
每個病人都不同	Every patient is different
未必用同一種方法都能找出病人的病因和受傷的地方	You may not be able to find the reason of sickness or the hurting spot using the same method
很多時候都會因情況而改變	The method should change according to different situations
令事情變得有挑戰性	Which makes things challenging
最有成功感是能作出準確診斷病人的問題	It is the most satisfying when I diagnose precisely the problem of the patients
及能夠見證病人康復	and witnessing their recovery
對我來說這就是最有成功感和最好的一件事	It is the most satisfying and the best thing for me
得著來說，學到很多知識是最重要	In terms of reward, learning so much knowledge is the most important
及所學的知識都是很實際和實用	Moreover, the knowledge I learnt is useful and practical
有很多其他科目都未必能把所學，運用在日常生活及工作上	The theories of other subjects may not be applicable to daily life and work
但這一科的知識是完全能夠運用	But the knowledge of Physiotherapy can be applied completely
每一個知識都是幫助你和診斷病人	All knowledge helps you to diagnose the patients
最重要是能夠確定自己喜歡這一科	The most important is that you ensure your passion for this major subject
因為有很多人失去興趣後就變得沒有動力學習	because many people won't have the motivation to study after losing the interest
以及要勤力	You need to be diligent, too
