

1 Foreword

Caritas Youth and Community Service Project Team has been commissioned by the Education Bureau (EDB) to implement the Multicultural Dream Pursuit Project (the Project) since 2015/16 for three academic years. The Project aims to go in line with schools in Hong Kong for providing life planning education for NCS students, and address the needs and concerns of NCS students in particular relating to their languages and cultures. It also serves to support schools in providing sustainable and practical comprehensive life planning education and career guidance for NCS students.

Not only does the Project team provide Student Training Courses, Career Visits and Work Experience Activities for 1801 NCS students, but also Parents' Briefing Session and Individual Counselling Service for about 10% of the participating NCS students' parents. The enhanced support on career planning will facilitate NCS students' planning of their studies and career pathways.
