

Annex 14a Activity R: The key points of 5 steps of critical thinking

1. Determine learning objectives
 - Define behaviors students should exhibit
 - Target behaviors in higher order thinking
2. Learn through questioning
 - Develop appropriate questions
 - Employ questioning techniques
 - Encourage interactive discussion
3. Practice before you assess
 - Choose activities that promote active learning
 - Utilize all components of active learning
4. Review and improve
 - Monitor class activities
 - Collect feedback from students
5. Provide feedback and assessment of learning
 - Provide feedback to students
 - Create opportunities for self-assessment
 - Utilize feedback to improve instruction
