Canada's Colleges, Institutes, CEGEPs and Polytechnics

World-Class Skills for World-Class Careers

Canada's colleges, institutes, CEGEPs and polytechnics are recognized worldwide for top-quality instruction and rigorous standards. With their practical, career-oriented programs, they are a great choice for acquiring the knowledge, skills and experience you need to succeed in the workplace.

More and more international students are turning to the Canadian college sector to gain the kind of hands-on skills that lead to meaningful careers in today's competitive job market. Over 60% of graduates find jobs in their field within six months of graduation, and 90% of employers are satisfied with the work they do.

What are colleges, institutes, and polytechnics?

Colleges, institutes and polytechnics are Canadian public postsecondary educational institutions catering to students looking for skills-based programs tailored to the job market. These schools offer a full range of credentials, including bachelor's degrees, certificates, diplomas, apprenticeships, postgraduate credentials, joint bachelor degrees with universities, continuing and online education, distance education, and even some masters' degrees.

What is a CEGEP?

CEGEP is short for Collège d'enseignement général et professionnel. CEGEPs are only found in Quebec and offer two streams of education: three-year technical programs and two-year pre-university programs, which are required for undergraduate admission to Quebec universities. The language of instruction at most CEGEPs is French, although there are some that teach in English.

Hands-on training with a strong career focus

Colleges, institutes, CEGEPs and polytechnics work closely with industries to ensure that courses reflect job market requirements. Programs are very practical, and most include work-integrated learning experiences through apprenticeships, work placements, co-op and internships. This approach gives you the opportunity to apply and test your skills in real workplace settings. It's a great way to prepare for your future career.

Why choose a college, CEGEP or polytechnic in Canada?

- Practical programs meet the needs of specific industries and employers.
- Work placements are available through co-op education and internships.
- Cutting-edge technology enables flexible program delivery.
- Over 90% of college graduates obtain employment within six months of graduation.
- Over 8,000 programs offered.

Did you know?

- Over 130 publicly funded colleges, institutes, CEGEPs and polytechnics in Canada, with more than 1,200 campuses.
- Programs are offered in English, French or both depending on the region.
- Program length varies from a few months to four years.

Canada's Elementary and Secondary Schools

Giving Your Child a Head Start to a Bright Future

Like all parents, you want the best for your child. That's the reason families like yours choose Canada for their children's education. They know that Canadian elementary and secondary schools (K-12) are among the world's best, and that Canadian standardized qualifications are recognized by colleges and universities all around the world.

Entrusting your child to the care of others is a big decision. But Canada's tradition of academic excellence takes every aspect of student life into consideration, ensuring a safe and supportive environment that meets all of your child's needs. Better yet, Canadian schools offer a full range of extracurricular and community activities to help students develop into well-rounded global citizens.

Whether you choose an accredited boarding school or a homestay program with a caring family, you can rest assured that your child will receive the attention and guidance needed to succeed in every way.

A welcoming environment for your child
International students can choose between homestay and boarding options.

At boarding school, your child will be immersed in Canadian culture and the English language (over 60% of boarding students are Canadian). Boarding schools are a great place to learn social skills and develop close ties with fellow students while homestay programs fully immerse students in local culture and offer a family environment to practice English and French language skills with native speakers.

In either case, your child will be welcomed with open arms as every effort is made to provide an environment conducive to success. Canada's stability, multiculturalism, clean environment, and world-class healthcare and education systems make it an ideal choice for your child's education.

Why choose K-12 in Canada?

- Excellent student-teacher ratios
- A nurturing environment focused on student needs
- A consistently high quality education that prepares students for postsecondary study
- Top-notch programs that are provincially accredited and government approved
- Secondary school diplomas recognized worldwide
- A direct pathway to high ranking universities and colleges
- Carefully screened and selected host families that are welcoming, caring and supportive

Canada's Universities

Your Springboard to Success

Looking for an unforgettable experience that will last a lifetime? Get your sights set on a top-quality education and a globally recognized degree?

You're not alone! In 2016, more than 232,000 international students who share the same goals as you chose Canada as the place to be for their university studies.

They came to acquire the kind of hands-on, 21st century skills they need to thrive throughout their careers and personal lives.

They came because Canadian universities are engines of innovation, fostering a bold spirit of inquiry and creativity. From developing the latest apps to spearheading social innovation in response to community needs, students are putting their ideas into action at universities across the country.

Get the hands-on experience employers are seeking

Applied learning is fast becoming the norm for today's university students. More than half of today's undergraduates participate in research and work-integrated learning experiences – such as co-operative education, internships and service learning – that give them the knowledge and skills they'll need to succeed.

Choose from an outstanding array of quality-assured programs

International students in Canada have a remarkable number of options available. Whether you prefer a major research-oriented university in a bustling urban centre or a small liberal arts institution in a quiet rural setting, Canada has more than 16,000 undergraduate and graduate programs to choose from at over 85 publicly funded institutions nationwide.

And whatever your choice – from business or engineering to film, multimedia and more – the quality of a Canadian university education is assured by provincial and territorial government charters.

Why choose a university in Canada?

- Caring and supportive professors
- Cutting edge technology and research labs
- Co-operative education (co-op) and internship options
- Opportunities to work on and off campus
- Great campus life
- Academic advisors who provide valuable guidance
- Health services for students and assistance programs offering support for students with disabilities
- Athletic activities and student clubs that connect you with other students
- Career development services and alumni networks to help you meet your goals
